This year’s meeting of Chief Information Officers and their Senior Staff will focus on Building and Sustaining Systems for Great Learning in our Great City Schools. Education has gone through tremendous change with increasing challenges over the last few years. James Clear states, “You do not rise to the level of your goals. You fall to the levels of your systems.” Join CIOs and other digital leaders from across the country to collaboratively lay out strategies to address: the impact of cyber threats, significant turnover in leadership, automation enterprise systems, competition for adequate funding, and the impact of new technologies on education such as Generative AI. CIO/CTOs and other digital leadership are critical to success in our schools.

***This meeting is for Chief Information Officers, Director and Managers of – Enterprise Applications (Business Solutions), IT Infrastructure & Architecture, Project Management, Customer Service & Support, IT Communications, and IT Security.***

## ABOUT THE COUNCIL

The Council of the Great City Schools brings together the nation's largest urban public school systems in a coalition dedicated to the improvement of education for children in the inner cities. The Council and its member school districts work to help our schoolchildren meet the highest standards and become successful and productive members of society. The organization also helps to build capacity in urban education with programs to boost academic performance and narrow achievement gaps; improve professional development; enhance the opportunity to learn; and strengthen leadership, governance, and management. The Council accomplishes its mission by connecting urban school districts from coast to coast who work under similar conditions.
