

4

How likely is it that you will have pizza tonight for dinner?

A horizontal scale from 0 to 10 with arrows pointing left and right, labeled 'Not at all' and 'Very likely'.

5

How many browser tabs are open on your computer?

A horizontal scale from 0 to 4 with arrows pointing left and right, labeled 'None' and 'More than 4'.

6

Be honest. If you won the lottery, would you share the winnings?

A horizontal scale from 'Yes!' to 'No!' with arrows pointing left and right.

7

### Community Agreements

With a common goal of creating an open and inclusive space, today in this session we aim to establish a setting where everyone can benefit and flourish.

- Learn by listening to others. Participate and interact with an open mind.
- Respect others.
- Consensus, not dissent.
- Share the air time.
- Language Matters: Language is a powerful vehicle for understanding and making spaces more welcoming. Use inclusive and respectful language, including appropriate gender pronouns as stated.

8

### Defining Our Work

**What it is...**

- An opportunity to network and collaborate with teachers across our district.
- Flexible and sustained Professional Learning Community (PLC) around student work.
- Igniting positive math experiences for our students and amplifying student voice.

**What it is not...**

- It is not office hours for tech support.
- It is not about what students or families "can't do". Our focus is asset-driven and solution seeking!

But I need/want...

- Tech Support
- A sounding board to "empty my cup"

### Why Student Work

# Collaborative Analysis of Student Work

**Student 2**

I think they share who i am because these are some my favorite things.

		I think this doesn't belong because it has large lips
		I think this doesn't belong because our world isn't only blocks
		I think this doesn't belong because it is bigger than everything else
		I think this one doesn't belong because it is non-realistic

**Student 6**

They are all a big part of my life and they are all things that I love.

A	B	The first item is dance. It is different from the others because it is something that I do every day and the others are just for fun
C	D	The next item is trampolining. It is different because it's the only one that you need to use a big object for.
		The next item is swimming /surfing at the beach. It's different because it is a big place. None of the others are at a big location.
		The last one is dogs. It's different because it is not an action like all the other ones.

**Student 4**

These images share who I am because I really like rockets. I selected these because they are all different from each other.

A	B	The first image does not belong because it is a rocket made by a different company and the Command module deattach from the rocket.
C	D	The second image does not belong because it is made by a different company and the company is a private one sending astronauts to space.
		This third image does not belong here because it is a space shuttle and it is made by NASA.
		This fourth image does not belong here because it is what they call a heavy rocket and able to transfer a lot of cargo.

**Student 1**

I am a big fan of the MCU (Marvel Cinematic Universe) and my favorite superhero is spiderman.

A	B	While they are all superheroes, Spider-Man is different <u>than</u> the others because he is the only one who is still a kid/going to school. He is the youngest, and has just started his superhero life.
C	D	While they are all superheroes, Iron man is different because he is the only one here who doesn't have physical powers. While his suit is impressive, without it he is only a guy.
		While they are all superheroes, Captain America is different <u>than</u> the others because he is the only one <u>who was has</u> an extended weapon: his shield.
		While they are all superheroes, Black Panther is different because he is the only one who is a king. No one else here is a member of royalty.
