CONTENTS

Contents	iii
Introduction	1
Methodology and Analysis	3
Elementary Achievement Indicators	5
Pre-K as a Percent of Kindergarten Enrollment	6
Secondary Achievement Indicators	23
Ninth-Grade Course Failures	24
Ninth Grade Students with B Average GPA or Better	40
Algebra I/Integrated Math I by Grade Nine	56
Advanced Placement Course Enrollment	72
Advanced Placement Exam Scores Three or Higher	88
Four-Year Graduation Rates	104
Attendance Indicators	121
Discipline Indicators	155
Out-of-School Suspensions	156
Number of Instructional Days Missed	172
Appendix A. Council of the Great City Schools	189

INTRODUCTION

Over the years, the nation's large urban school districts have consistently learned from the progress of their peer districts across the country. Great City School districts that have embraced the challenge of educating America's urban children have recognized the value of benchmarking their performance and growth against the progress of others.

In 2002, the board of directors of the Council of the Great City Schools (Council) authorized what became known as the Performance Measurement and Benchmarking Project to develop and implement key performance indicators across the member school districts in operations, business services, finances, human resources, and technology. These performance indicators in operations have evolved over the years and are now reported annually by the Council in its *Managing for Results in America's Great City Schools* series. However, one critical element was not included in these annual reports: academic performance.

In the same year, 2002, six member districts of the Council began participating voluntarily in the Trial Urban District Assessment (TUDA) of the National Assessment of Educational Progress. The purpose of this participation was to gauge performance across state lines, compare progress, and ascertain what reforms seemed to be working. As of 2026, there will be 26 Council member districts participating in TUDA. Of course, not all Council member districts are eligible for TUDA, and TUDA results do not provide all the academic comparisons that member districts would like to make.

Because of that information gap, the board of directors took the next step in authorizing the development of *Academic* Key Performance Indicators (KPIs) in October 2014. To put the board's wishes into place, teams of educators from Council member districts came together to begin drafting initial indicators in general instruction, special education, English language learners, and a number of academic cost indicators. A lengthy list of potential indicators developed by the teams was refined and narrowed to a smaller set for piloting in 2015. Eight member districts participated in the pilot.

Based on the pilot, data-collection surveys and the indicators themselves were further refined, and all Council member districts were asked to participate in a full-scale pilot of the Academic Key Performance Indicators in 2016. A third pilot was conducted in 2017 and included the collection of data across three school years. The 2025 report presents an updated set of data through school year 2023-24. This report presents a number of different ways that member districts can analyze the data themselves by disaggregating results, showing trends, and combining variables. Along with the print report, a companion online dashboard was updated that adds the ability to conduct several comparisons and analysis beyond what is presented in this report. To access this system, navigate to the "Research" folder at <https://connect.cgcs.org/cgcs-shared-resources> .

This report focuses on the data collection and analysis of the following Academic KPIs:

- Pre-K enrollment relative to Kindergarten enrollment
- Algebra I completion rates for credit by grade 9
- Ninth grade course failure rates — at least one core course
- Ninth graders with B average (GPA) or better
- Absentee rates by grade level
- Suspension rates
- Instructional days missed per 100 students due to suspensions
- AP participation rates
- AP-equivalent participation rates
- AP exam pass rates
- Four-year graduation rate

METHODOLOGY AND ANALYSIS

A. Methodology

Developing the KPIs

This study sought to answer the following questions:

1. Is it feasible to develop Academic KPIs and collect data on them across member urban school districts?
2. Are comparisons between districts on academic performance measures valid and reliable?
3. Do districts collect and maintain requested KPI data in a way that they can easily retrieve and format them?
4. Are data collection tools clear and easy to use?
5. Do the results of data analysis provide valuable insights into district academic performance and student achievement?
6. How should the indicators be refined going forward?

To answer these questions, Council staff organized a process to develop and collect KPIs in three phases. The first phase involved the development of academic performance and cost KPIs. The second phase involved a small pilot of performance and cost KPIs in eight districts. These districts included Albuquerque, Atlanta, Austin, Baltimore, Houston, Los Angeles, Kansas City (MO), and Milwaukee. The final phase assessed the viability of collecting comparable performance indicators across all Council member districts.

During the first phase, three advisory groups were formed and convened to develop the academic and cost indicators. These groups included administrators from Council member districts in the areas of curriculum and instruction, English language learners, and special education. Representatives from each area formed three homogeneous advisory groups. After several meetings, the groups submitted a list of potential KPIs on academic indicators as well as financial expenditure indicators in each area. Finally, a literature review was conducted to identify variables that predicted student outcomes and could be used to formulate KPIs, and to identify past efforts by others to benchmark performance and costs.

The indicators and costs were then reviewed by a team of general education, special education, English language learner, finance, and research department representatives to determine the feasibility of collecting comparable data across districts. The review included the relative value of each indicator, the data collection burden of the indicator, and the ability to disaggregate the data by student group (e.g., ELL, students with disabilities, ethnicity, gender, etc.). The original list of KPIs was then narrowed from 200 key performance indicators to approximately 58 performance and cost measures.

During phase two of the process, the Council team piloted the data collection instruments and the KPI definitions in 2015 with the eight member school districts listed above. Throughout the piloting process, data-collection tools and definitions were continuously revised based on feedback from participating districts and results from an initial data analysis effort.

Phase three of the pilot involved a full-scale data-collection effort to assess the viability of the indicators across a larger number of Council member districts. After revising indicator definitions and the survey instrument based on the pilot, the Council team developed two methodologies by which to collect the data. The first methodology involved an on-line survey, and the second methodology involved Excel data sheets that district staff could populate with their information. The purpose of this phase of the work was to test the potential of collecting academic performance indicators across all districts. The cost indicators

developed in phase 1 and phase 2 were deferred to future data collection efforts, while the Council staff devoted time to the development of the performance indicators.

The current phase of the work, which has resulted in this report, involved updating the indicators and working with member districts on the accuracy of their data across multiple years.

This report illustrates the current use of the performance indicators as viable measures of student achievement outcomes across all member districts. The data are based on results from about 56 member districts. Not all member districts completed all KPIs, but the charts and tables summarize the data from all respondents.

B. Analysis

Organizing and Presenting the Data

The analysis presented here is divided into four sections: 1) elementary achievement indicators, 2) secondary achievement indicators, 3) attendance indicators, and 4) disciplinary indicators. Not all data were presented or analyzed, but the recently developed online system allows for extensive analysis. Finally, data are reported here by district using codes. For each one, these codes correspond to the codes used in the non-instructional KPIs. In the graphs, each bar represents a responding school district.

Elementary Achievement Indicators

The current early childhood KPI divides the pre-K enrollment reported on the KPI data survey by the kindergarten enrollment. This gives a preliminary proxy measure of the size of districts' pre-K program relative to kindergarten enrollment. Figures 1.1 to 1.24 show the relationship between Pre-K and Kindergarten enrollments and how they have changed between 2018-19 and 2023-24. The data is also disaggregated by a number of demographic variables.

1.1 Pre-K Enrollment as a Percent of Kindergarten Enrollment for Students, 2023-24

Pre-K Enrollment as a Percent of Kindergarten Enrollment for Students

Note: Higher values and larger increases are desired

- Figure 1.1: Total number of pre-K Students divided by total number kindergarten Students, 2023-24

- San Diego
- St Paul

1.23 Percentage Point Change in Pre-K Enrollment as a Percent of Kindergarten Enrollment for English Language Learners, 2018-19 to 2023-24

Secondary Achievement Indicators

Secondary achievement indicators included:

- Ninth-Grade Course Failures and GPAs, by Subgroup
- Algebra I/Integrated Math I (or equivalent) by Grade Nine
- Advanced Placement Course Enrollment
- AP Exam Scores
- Four-Year Graduation Rates

Figures 2.1 to 2.24 show the percentage of ninth grade students by district who have failed one or more core (mathematics, science, English language arts, or social studies) courses during the ninth grade year. The indicator is based on research demonstrating the relationship between core course failures in the ninth grade and eventual high school graduation.

Figures 2.25 to 2.48 show the percentage of ninth grade students with a B or better grade point average.

Figures 2.49 to 2.72 show the percentage of first time ninth grade students successfully completing Algebra I or equivalent by the end of grades seven, eight, or nine. The counts in each grade do not overlap or duplicate one another. Completion of this course has been shown to effectively predict graduation rates.

Figures 2.73 to 2.96 and 2.97 to 2.120 compare district performance on advanced placement (AP) indicators, including the percent of secondary school students who took one or more AP courses and the percent of all AP exam scores by district that were three or higher, meaning that they qualified for college credit.

Figures 2.121 to 2.144 report the four year cohort graduation rates of each district

2.1 Percentage of Ninth Grade Students Who Failed One or More Core Courses, 2023-24

Percentage of Ninth Grade Students Who Failed One or More Core Courses

Note: Lower values and larger decreases are desired

2.143 Percentage Point Change in Four Year Cohort Graduation Rate for English Language Learners, 2018-19 to 2023-24

Attendance Indicators

Attendance measures were collected on students in grades three, six, eight, and nine who were absent from school. Comparisons across districts are made for students who were absent cumulatively over the course of the school year for five to nine days, ten to nineteen days, and twenty or more days. The unit of analysis here is the number of students who missed school for the specified lengths of time. Figures 3.1 through 3.32 illustrate how districts compare on their absence rates in the specified grades. The total number of days missed is divided by the total number of students enrolled in that grade during the school year at any point.

3.1 Percentage of Grade 3 Students Absent, 2023-24

3.2 Percentage of Grade 6 Students Absent, 2023-24

3.3 Percentage of Grade 8 Students Absent, 2023-24

3.4 Percentage of Grade 9 Students Absent, 2023-24

3.5 Percentage of Grade 3 Black Male Students Absent, 2023-24

3.6 Percentage of Grade 6 Black Male Students Absent, 2023-24

3.7 Percentage of Grade 8 Black Male Students Absent, 2023-24

3.8 Percentage of Grade 9 Black Male Students Absent, 2023-24

3.9 Percentage of Grade 3 Black Female Students Absent, 2023-24

3.10 Percentage of Grade 6 Black Female Students Absent, 2023-24

3.11 Percentage of Grade 8 Black Female Students Absent, 2023-24

3.12 Percentage of Grade 9 Black Female Students Absent, 2023-24

3.13 Percentage of Grade 3 Hispanic Male Students Absent, 2023-24

3.14 Percentage of Grade 6 Hispanic Male Students Absent, 2023-24

3.15 Percentage of Grade 8 Hispanic Male Students Absent, 2023-24

3.16 Percentage of Grade 9 Hispanic Male Students Absent, 2023-24

3.17 Percentage of Grade 3 Hispanic Female Students Absent, 2023-24

3.18 Percentage of Grade 6 Hispanic Female Students Absent, 2023-24

3.19 Percentage of Grade 8 Hispanic Female Students Absent, 2023-24

3.20 Percentage of Grade 9 Hispanic Female Students Absent, 2023-24

3.21 Percentage of Grade 3 Free or Reduced-Price Lunch (FRPL) Students Absent, 2023-24

3.22 Percentage of Grade 6 Free or Reduced-Price Lunch (FRPL) Students Absent, 2023-24

3.23 Percentage of Grade 8 Free or Reduced-Price Lunch (FRPL) Students Absent, 2023-24

3.24 Percentage of Grade 9 Free or Reduced-Price Lunch (FRPL) Students Absent, 2023-24

3.25 Percentage of Grade 3 Students with Disabilities Absent, 2023-24

3.26 Percentage of Grade 6 Students with Disabilities Absent, 2023-24

3.27 Percentage of Grade 8 Students with Disabilities Absent, 2023-24

3.28 Percentage of Grade 9 Students with Disabilities Absent, 2023-24

3.29 Percentage of Grade 3 English Language Learners Absent, 2023-24

3.30 Percentage of Grade 6 English Language Learners Absent, 2023-24

3.31 Percentage of Grade 8 English Language Learners Absent, 2023-24

3.32 Percentage of Grade 9 English Language Learners Absent, 2023-24

Discipline Indicators

The discipline indicators in this section focus on out-of-school suspensions. The two KPIs for discipline include the percentage of students suspended for 1 to 5 days, 6 to 10 days, 11 to 19 days, or 20 or more days in the school year, and the total number of instructional days missed due to suspension for the year. Figures 4.1 to 4.24 show the percentage of students who were suspended out-of-school for 1 to 5 days, 6 to 10 days, 11 to 19 days, and more than 20 days cumulatively over the course of the school year. The unit of analysis is students. Figures 4.25 to 4.48 show the number of instructional days missed per 100 students in each district. These data allow districts to compare numbers of lost instructional days independent of overall district enrollment. The unit of analysis is number of days suspended per 100 students.

APPENDIX A. COUNCIL OF THE GREAT CITY SCHOOLS

Council of the Great City Schools

The Council of the Great City Schools is a coalition of 81 of the nation's largest urban public school systems. Its board of directors is composed of the superintendent of schools and one school board member from each member city. An Executive Committee of 24 individuals, equally divided in number between superintendents and school board members, provides regular oversight of the 501(c) (3) organization. The mission of the Council is to advocate for urban public education and assist its members in the improvement of leadership and instruction. The Council provides services to its members in the areas of legislation, research, communications, curriculum and instruction, and management. The group convenes two major conferences each year; conducts research and studies on urban school conditions and trends; and operates ongoing networks of senior school district managers with responsibilities in areas such as federal programs, operations, finance, personnel, communications, research, and technology. The Council was founded in 1956 and incorporated in 1961 and has its headquarters in Washington, DC.
